YOU ARE BILLIONAIRE HERE!

All are not billionaires by birth, but specific plan wise decisions and valuable ways they choose make them billionaires. In addition to being the owners of the 5.25 Guntas (5720 sq.ft) land, it is a golden opportunity to own 75 red sandalwood plants with small investment in the NSF projects field of Red Sandalwood agriculture. The cultivation of red sandalwood plants would take place under the supervision of scientists and the NSF team with qualified staff of the company for 12 years. Revenue from the densely grown plants is worth crores of rupees. That means every small investment you make will make you a billionaire.

WHAT IS THE WORTH OF RED SANDALWOOD?

The most expensive tree in the world is red sandalwood; Cultivation of these are only available in 10 countries. It is also promoting the cultivation of red sandalwood as the red sandalwood produced in our country has internationally very high demand and its production is low. According to the price fixed by the government, their value is 20 lakhs a ton. With the cultivation of 75 trees at least 11 tons of red sandalwood will be produced.

**NOW AN EXCELLENT GOLDEN OPPORTUNITY TO EARN CRORES OF RUPEES IS
ONLY POSSIBLE WITH NAAGARAJ SANDALWOOD FARMS PROJECTS.**
